

# ADL II (Formerly AdipoLean)

NPN 80087665

## What Is It?

ADL II combines the clinically researched LOWAT® blend of Ayurvedic herbal extracts with OligonoI®, a proprietary blend of lychee and green tea extracts produced with shorter-chain monomers and polymers for enhanced efficacy. This unique combination provides antioxidants that help protect against the oxidative damage caused by free radicals.

## Uses for ADL II

**Antioxidant Support:** LOWAT® (LI10903F) is a proprietary blend of *Piper betle* leaf extract and *Dolichos biflorus* seed extract combined in a specific ratio. Both herbs have been traditionally used, and *in vitro* and animal research have evaluated this combination and ratio. LOWAT® has also been studied in an eight-week, randomized, double-blind, placebo-controlled trial. OligonoI® is a lychee fruit extract produced by converting the long-chain polyphenol polymers into more bioavailable shorter-chain monomers and oligomers. This process increases the bioavailability of these polymers, allowing for enhanced antioxidant support. OligonoI® has been studied in randomized, placebo-controlled trials, and animal research indicates that this extract helps decrease oxidative stress in cells throughout the body, including adipocytes.

## What Is The Source?

LOWAT® (LI10903F) is a proprietary blend of *Piper betle* leaf extract and *Dolichos biflorus* seed extract. OligonoI® is a proprietary blend of lychee fruit extract (*Litchi chinensis*) and green tea leaf extract (*Camellia sinensis*) and standardized to contain 10% monomeric phenols. Ascorbyl palmitate is derived from corn dextrose fermentation and palm oil.

## Recommended Dose

**Adults:** Take 1 capsule three times daily with meals, or as directed by a healthcare practitioner. Consult a healthcare practitioner for use beyond eight weeks.

## Warning

Do not use if you are pregnant or trying to conceive. Consult a healthcare practitioner prior to use if you are breastfeeding, have a liver disorder or an iron deficiency. Rare, unpredictable cases of liver injury associated with green tea extract-containing products have been reported. Stop use and consult a healthcare practitioner if you develop symptoms of liver trouble, such as yellowing of the skin or eyes, stomach pain, dark urine, sweating, nausea, unusual tiredness, or loss of appetite.

## ADL II

Medicinal Ingredients (per capsule)				
LOWAT®.....				
Containing:				
Betel ( <i>Piper betle</i> ) Leaf Extract.....				
(7:1, 840 mg dried equivalent)				
Catjang cowpea ( <i>Dolichos biflorus</i> ) Seed Extract.....				
(12:1, 2,160 mg dried equivalent)				
OligonoI® <i>Camellia sinensis</i> leaf/ <i>Litchi chinensis</i>				
Fruit Pericarp Extract .....				
(providing 10% monomeric phenols)				
Non-Medicinal Ingredients: Hypoallergenic plant cellulose, vegetarian capsule (hypromellose, water), ascorbyl palmitate, silica.				

LOWAT® is exclusively distributed by Lonza or its affiliates.

OligonoI® is a registered trademark of the Amino Up Chemical Company, Sapporo, Japan.
